

## Recycling cylinders for used refrigerants

Recycling cylinders (12,5 l / 27,2 l / 61 l) are to be used exclusively for used refrigerants. The cylinders should not be filled to more than 75 percent.

12,5 l cylinder	27,2 l cylinder	61 l cylinder
9,5 kg	20 kg	45 kg

Each recycling cylinder is provided with a sticker to label the charged refrigerant.

Refrigerants R22 / R134a / R404A can be checked, other refrigerants must be written on the label with a weather-resistant pen. When it comes to mixtures, please check or write all the containing refrigerants.

In addition, the filling quantity must be listed on the label. The maximum quantities depending on cylinder size as listed above must not be exceeded. For ensuring the safety use a calibrated scale.

**ATTENTION:**

For safety reasons we are obliged to let the TÜV test overfilled cylinders. The costs are charged to the filler. If there is an accident, the filler is solely responsible and liable.

Recycling cylinders must not be filled with waste oils, pressure-free or flammable refrigerants. The percentage of used oil in used refrigerants shall not exceed 20 %.
